

INDUSTRY-READY PROGRAM

Complete DevOps Roadmap

From zero to production-ready engineer in 24 weeks.
Master the tools, workflows, and thinking that top
companies demand.

24

WEEKS

16

DAYS / WEEK

100+

HANDS-ON LABS

Build. Deploy. Automate. Succeed.

The Most In-Demand Skill in Tech

Every company that ships software needs DevOps engineers. DevOps professionals command top-tier salaries, serve as the bridge between development and operations, and enjoy future-proof career paths spanning Cloud Engineering, SRE, and Platform Engineering. This program goes beyond teaching tools; you will develop production-ready critical thinking to diagnose real failures and design resilient architectures under pressure.

CURRICULUM

Complete 16-Module DevOps Roadmap

00	DevOps Fundamentals SDLC Agile & Scrum DevOps Lifecycle Cloud Basics VMs vs Containers 12 Factor App CI/CD Overview 1 Wk
01	Linux & System Administration Filesystem SSH Bash Scripting Package Mgmt Process Mgmt Networking Cmds grep/sed/awk Systemd Cgroups Namespaces Labs: Configure Server, Debug Issues, Automate Setup 3 Wks
02	Networking for DevOps OSI / TCP-IP DNS SSL/TLS Load Balancer Reverse Proxy CDN VPN API Gateway Labs: NGINX Proxy, DNS Debug, SSL Setup 2 Wks
03	Git & Collaboration Branching Merge / Rebase GitHub Flow GitLab Flow PRs Code Review SemVer 1 Wk
04	Python for DevOps JSON / YAML Requests Logging subprocess REST APIs argparse Project: Infrastructure Automation Script 2 Wks
05	Docker Images Containers Dockerfile Volumes Compose Multi-stage Builds BuildKit Image Scanning Project: Containerize Frontend, Backend, PostgreSQL, Redis 3 Wks
06	Kubernetes Architecture Pods / Deployments Services PV / PVC Ingress Helm Kustomize RBAC HPA / VPA Network Policies Project: Deploy Full Stack on Kubernetes 5 Wks
07	CI/CD GitHub Actions Jenkins GitLab CI ArgoCD GitOps Blue-Green Canary Deploy Project: Complete CI/CD Pipeline (Git to K8s) 3 Wks
08	Infrastructure as Code Terraform Providers Modules Remote State Ansible Playbooks Roles EC2 / VPC / IAM 3 Wks
09	AWS Cloud IAM EC2 VPC ALB / ASG S3 EKS RDS CloudWatch Route53 Secrets Mgr Deploy Kubernetes Application on AWS 3 Wks

10	Monitoring & Observability Prometheus Grafana Loki ELK Stack OpenTelemetry Jaeger Alertmanager SLI / SLO / SLA <i>Project: Complete Monitoring Stack</i> 2 Wks
11	DevSecOps Trivy Checkov Falco Kyverno Vault Image Scanning IaC Scanning SBOM 2 Wks
12	Production Operations Incident Response RCA Capacity Planning HA / DR Chaos Engineering Load Testing 2 Wks
13	Production Troubleshooting CrashLoopBackOff OOMKilled ImagePullBackOff TLS / DNS Failure Node Failure Terraform Drift CI/CD Failure <i>Every class is a broken production env. Students must fix it.</i> 2 Wks
14	Production System Design Netflix / Uber / Spotify GitHub / Airbnb / Amazon Microservices Event-Driven Cache / Queue 1 Wk
15	AI Infrastructure GPU Fundamentals NVIDIA Toolkit GPU Operator vLLM / Ollama K8s GPU Scheduling AI Model Serving 1 Wk
16	Career Preparation Resume Review GitHub Portfolio LinkedIn HR Interview Technical Interview System Design Mock Interviews Salary Negotiation 1 Wk

CAPSTONE PROJECT

4-Week Production Simulation

Work in teams as a real DevOps team deploying a production-grade e-commerce platform.

- +

Design architecture from scratch
- +

Containerize with Docker
- +

Build CI/CD pipelines
- +

Monitoring: Prometheus, Grafana, Loki
- +

Simulated production incidents
- +

Provision AWS via Terraform
- +

Deploy on Kubernetes (EKS)
- +

GitOps with ArgoCD
- +

Security, autoscaling, backup, DR
- +

Final architecture review and demo

OUTCOMES & CAREER PATHS

What You Will Achieve

By the end of this program, you will be able to design scalable production architectures, administer Linux systems, containerize and orchestrate applications with Docker and Kubernetes, automate infrastructure with Terraform and Ansible, build robust CI/CD pipelines, deploy and manage applications on AWS, implement monitoring and observability stacks, apply DevSecOps best practices, and diagnose real production incidents under pressure.

- DevOps Engineer

Cloud Engineer

Kubernetes Engineer

Platform Engineer

SRE

Cloud Architect
- DevSecOps Engineer

AI Infra Engineer
